Project Name:	**DestinEase**
Team:	Visionary Techs
Project Description:	DestinEase is an innovative AI-driven platform designed to provide travelers with personalized destination attractions. By analyzing user preferences such as budget, food and whether and others.
	For Travelers
	who seek travel recommendations based on their preferences
	the DestinEase App
	is a smart recommendation system
	that provides personal travel recommendations
	unlike generic travel guides or manually searching for destinations,
	our application leverages user data and machine learning to offer highly relevant and personalized destination recommendations.
Benefit Outcomes:	• **Improved travel planning efficiency**: Users can find their ideal destinations attractions and activities and accommodations faster, reducing the time spent on manual research. • **Cost-effective trip planning** • **Real-time data integration**: Users get accurate weather and price data
